

EACO - EACO-N Open or closed clamps for pre-insulated ducts

Description

Open or closed collars manufactured from 0.4 mm aluminized steel sheet, suitable for fastening sandwich ducts in air distribution systems. The open design of the EACO-N facilitates installation while ensuring stable support and proper load distribution. The aluminized finish provides excellent corrosion resistance and long service life.

- Advantages**
- The special open design significantly reduces overall dimensions compared to traditional collars, optimizing storage and transportation while enabling substantial savings in logistics costs.
- Reduced overall dimensions by up to 70% compared to traditional closed collars;
 - Lower transportation and storage costs;
 - Quick and easy installation.

- Models**
- EACO – Closed collar.
 - EACO-N – Open collar (optimized for transportation).
