

EBKSF Duct support kit

Description

The EBKSF H-Frame kit provides a complete rooftop mounting solution designed to support HVAC equipment, ventilation ducts, cable trays, and piping systems.

This professional-grade system combines high-density polyethylene construction with integrated anti-vibration technology, ensuring reliable performance in demanding commercial and industrial applications.

Characteristics

Installation kit consisting of:

- 2 support feet in glass fiber reinforced polypropylene;
- 2 rubber anti-vibration mounts;
- 2 fixing angle brackets;
- 4 M10 × 25 mm hex head screws;
- 4 M10 nuts.

Use

Ideal for supporting ventilation equipment, mechanical systems, electrical installations, and process piping in commercial buildings, industrial facilities, and rooftop environments where membrane integrity and vibration control are critical.
