

EAPS Steel profiles

Description

Light profile used to attach collars, plates and accessories of modest size and weight.

Characteristics

“Made in Italy” marking on the side, with metric scale.

Serrated inner edges.

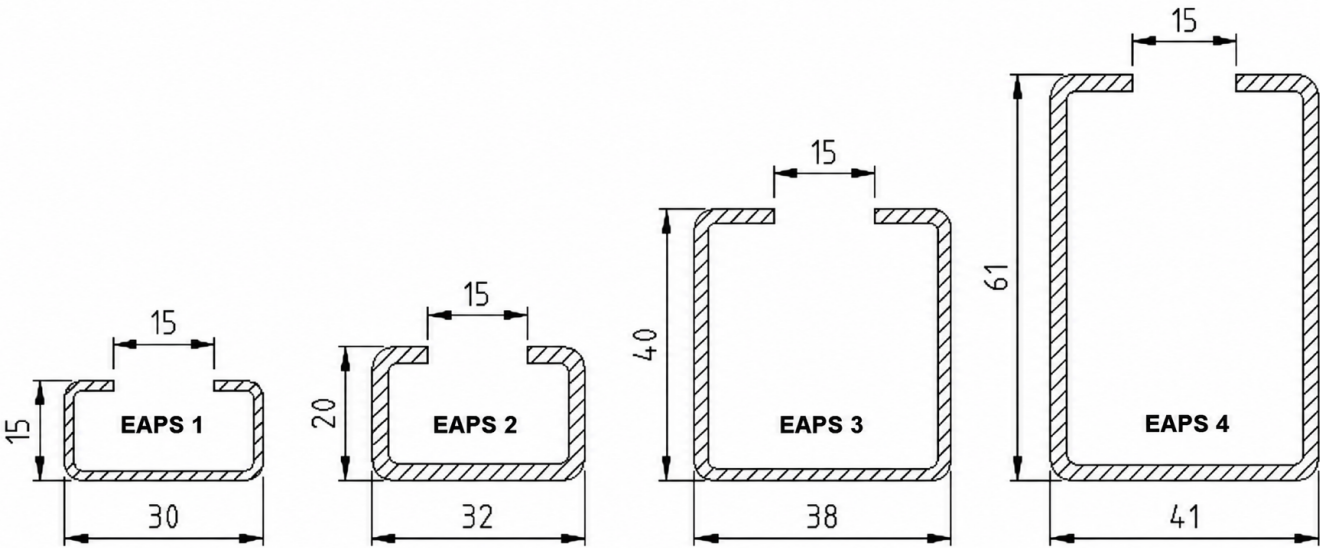

Material

Made of DX51D + Z EN 10346 steel (Fe 360 SENDZIMIR).

Use

Air duct systems: ventilation, air conditioning, and refrigeration systems, with the possibility of use as support and mounting elements for building services distribution.

Metal carpentry: modular structures, cable trays, and frames for equipment and machinery, also suitable for the construction of support structures for HVAC systems and technical installations in residential and industrial applications.

Price List

* black plastic cap for the closing of the head of the profile. It has both aesthetic and safety function.
