

EACLIPS Clips

Description

EACLIPS clips for weld pins are fastening components designed for the installation of insulation materials in HVAC systems, ensuring secure and long-lasting anchorage.

The clip provides effective insulation retention while contributing to installation safety and reliable performance during system operation.

Characteristics

Material: galvanized steel.

Diameter: 30 mm.

Pin compatibility: 2, 2.2, 2.7, 3, 4 mm.

Use

Suitable for fastening insulation materials to support surfaces in HVAC systems, industrial piping, and air duct systems.
