

EAWF Nails

Description

EAWF weld pins provide a professional-grade solution for fastening insulation materials to metal surfaces in HVAC and industrial applications. Each fastener features a precision-engineered galvanized steel pin, securely bonded to a steel washer head, creating a reliable one-piece fixing system that simplifies installation while ensuring long-lasting performance.

Use

The EAWF pin operates seamlessly with resistance welding machines and capacitor discharge systems, including welding tools.

Characteristics

Material: galvanized steel.

Diameter: 3.5 mm.

Circular base with integrated clip, 0.4 mm thickness, with rolled edge in galvanized steel.
