

Steel fasteners for turning vanes Funghetti

Description

Mushroom head bolts represent the professional standard for fixing vanes in rectangular duct systems. These precision-engineered fasteners are specifically designed to support optimal airflow management while ensuring durable and leak-tight installations.

Characteristics

Material : galvanized steel.

Sealing washer: Ø 50 mm butyl rubber.

Use

Suitable for fixing vanes in rectangular duct systems, including elbows, joints, and directional transitions.

Particularly recommended for applications where airflow optimization is critical to system performance and overall energy efficiency.
