

ETM12-HT Flexible duct for temperatures up to 180°C

Description

Flexible duct made of polyester fabric, special PU for high temperatures coated, and inner steel wire helix. Thanks to the special execution this duct results light but very flexible, with high resistance to rips and perforations.

Characteristics

Colour : matt black;

Temperature range : from -40°C to +180°C (+200°C peaks);

Production diameters : from 51 to 300 mm.

Size

Standard 10 meters (20 meters on request).

Use

- Industrial aspiration;
- Aspiration of combustion vapor passage;
- Systems with dryers and dehumidifiers.

Reaction to fire

Self-extinguishing class M1 UL94, class VTM-0.

Price List

Dimensions are expressed in millimetres (mm).

Prices are quoted per linear metre (m).
