

EFD Traction devices for cable ties

Description

The locking device is engineered for integration with EFN banding systems, ensuring optimal coupling and continuous clamping along the entire duct circumference.

The tilting housing allows precise adjustment of the clamping diameter, facilitating installation and on-site adaptation. The triple-drive head configuration (hex, Phillips, and slotted) is compatible with both manual and powered tools commonly used in HVAC applications.

Characteristics

Material : tempered galvanized steel.

Pack : 50 pieces.

Use

Suitable for cable tie belts.

Accessories

EFN – 30-meter roll of band-style quick-release duct clamps.
