

EFM Hose clamps

Description

EFM pre-sized clamps eliminate the need for on-site measuring and cutting, reducing installation time.

Available in five standard diameters ranging from 60 mm to 660 mm, compatible with the main types of flexible ducts.

The welded locking device ensures secure, stable, and permanent fastening, in compliance with standard HVAC installation practices.

Characteristics

Tape material: AISI 430.

Height : 9 mm.

Use

Small, medium and large air conduction canals, gas, smoke and dust. Versatile and practical in its implementation, it is distinguished by its ability to tighten and lock hoses, pipes, flexible canals and semi-rigid tubes in animated plastic and aluminum of all sizes.
