

EBOX-N

Box di distribuzione in acciaio zincato o verniciato RAL 9016

Description

Distribution box for supply or extract air in MVHR systems, manufactured in galvanized steel or painted white RAL 9016, complete with sound-absorbing insulation.

The spigots for connection to HTPC PLUS corrugated ducts are made of polypropylene and, thanks to a quick coupling system, are perfectly interchangeable between Ø63 mm (standard) and Ø76 mm (optional accessory).

Furthermore, the Ø63 mm spigots (standard) are equipped with an externally adjustable butterfly damper for simple and effective system balancing. Ø76 mm spigots are also designed for butterfly damper installation; the damper is supplied separately upon request.

Features

Each EBOX-N model is designed for the installation of up to 4 additional side spigots, 2 on each short side. Additional spigots are not included with the box.

The connections are suitable for HTPC PLUS ducts with Ø63 mm internal diameter and Ø76 mm external diameter.

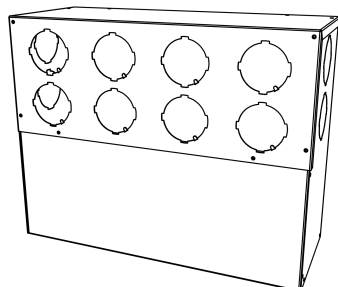

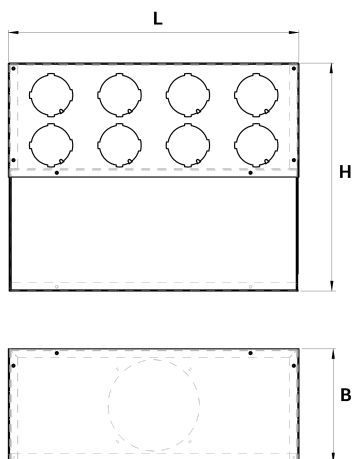

Models

- EBOX-NS-463 galvanized distribution box 270x401x200 mm with 4 × Ø63 mm connections and main connection Ø160 mm.
- EBOX-N-463 galvanized distribution box 270x401x200 mm with 4 × Ø63 mm connections and main connection Ø125 mm.
- EBOX-N-663 galvanized distribution box 390x401x200 mm with 6 × Ø63 mm connections and main connection Ø160 mm.
- EBOX-N-863 galvanized distribution box 510x401x200 mm with 8 × Ø63 mm connections and main connection Ø160 mm.
- EBOX-N-1063 galvanized distribution box 630x401x200 mm with 10 × Ø63 mm connections and main connection Ø160 mm.

Accessories

- M63-EASY - Ø63 mm spigot;
- M76-EASY - Ø75 mm spigot;
- S-EASY - Balancing damper for spigot;
- T-EASY - Closing cap.
