

EVHRP SLIM

High efficiency heat recovery unit for flow rates up to 110 m³/h

Description

Ventilation unit complete with heat recovery exchanger, dedicated to air renewal without wasting of energy. The unit is particularly suitable for single family housing, apartments and in all cases where the nominal flow rates for air exchange do not exceed 110 m³/h. Constant flow rate selectable in 3 levels.

Features

Sheet metal self-supporting frame. Galvanised sheet metal panels, painted on the outside, with high density EPS internal insulation; Alucobond Composite front panel. High efficiency counter-current cross-flow polypropylene heat exchanger. Low freezing temperatures. Very high heat exchange efficiency. Brushless fans with electronic motor and constant flow control; very high efficiency and low noise levels. ePM1 80% filters with low pressure drop for both supply and exhaust, easily removable.

Use

Homes, clinics, for air exchange with up to 90% reduction in energy waste.

Control electronics version S2

The unit is supplied without electronic board and the fan speed is changed by means of a 0-10V input signal. It is possible to purchase the EVTVDV remote terminal with LCD display separately, to control the speed of the fans and the bypass with various advanced functions, including:

- control of the speed of the individual fans independently, which means that the machine can be used in positive pressure or negative pressure mode;
- timed dirty filter warning;
- possibility of connecting the EVSQV air quality sensor, sold separately.

Control electronics version IN2

Electronic board for 3-step speed management, antifreeze function and automatic bypass. Wall-mounted remote touch panel on 503 box. On-board temperature sensors and possibility of managing auxiliary hot water coil. Humidity / air quality regulators built into the remote display.

EVCNV2-N: advanced remote control with built-in humidity and VOC/CO₂ sensors, black.

EVCNV2-B: advanced remote control with built-in humidity and VOC/CO₂ sensors, white.

EVCNW2-N: advanced remote control with built-in humidity and VOC/CO₂ sensors and built-in Wi-Fi, black.

EVCNW2-B: advanced remote control with built-in humidity and VOC/CO₂ sensors and built-in Wi-Fi, white.

Electronic configuration IN2

A or B configurations selectable by electronics.

Technical Specifications

Size EVHRP SLIM		EVHRP SLIM
Fan Type		Centrifughi a pale avanti - motore elettronico direttamente accoppiato Brushless
Nr. Funs	Nr.	2
Airflow	m³/h	110
Available Pressure	Pa	100
Heat Exchanger (Data according to UNI EN 13141-7: Indoor Temp. 20°C – Indoor Humidity 28% – Outdoor Temp. 7°C – Outdoor Humidity 72%)		
Recovery Efficiency		Ounterflow Plates – Polypropylene Material
Number of Heat Exchangers	Nr.	1
Heat Recovery Efficiency	%	89,5
Filters		
Tipo di Filters		Filters Piani
Filtration Class		ePM1 80%
Acoustic data (Data according to UNI EN 3741 and UNI EN 3744)		
Sound Power Lw Transmitted Through the Structure	dB(A)	49
Sound Power Level (Lw) Radiated from the Duct	dB(A)	53
Average Sound Pressure Level (Lp) at 1 m	dB(A)	42
Average Sound Pressure Level (Lp) at 3 m	dB(A)	34
Electrical data		
Power Supply	V / ph / Hz	230 / 1 / 50
Current Consumption	A	0,35
