

ETST Spiro tube cap

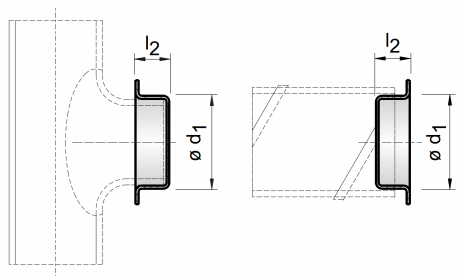

Description

The ETST end cap is a component designed for the terminal closure of circular spiral duct systems, providing a secure and reliable seal at the ends of the air distribution network.

Used both during installation and for the permanent closure of unused duct sections, the ETST end cap prevents airflow passage while maintaining the integrity and airtightness of the system.

Features

Material : galvanized sheet. Ø 80 - 300 mm
sheet thickness 0.6 mm Ø 315 - 400 mm
sheet thickness 0.7 mm.

Versions

ETST: Male plug for spiro tube without gasket;
ETST-G Male plug for spiro tube with gasket.
