

MM Male coupling connectors

Description

The MM male coupling is a connection component designed to quickly join two female components within an air distribution system, ensuring mechanical continuity and airtightness throughout the duct network.

Thanks to its straight geometry and precise manufacturing, the MM coupling provides simple, secure, and reliable connections between ducts, fittings, and accessories, facilitating both installation and maintenance operations.

Features

Material thickness:

- $\varnothing 80 - 300 \text{ mm}$: $s = 0.6 \text{ mm}$;
- $\varnothing 315 \text{ mm}$: $s = 0.7 \text{ mm}$.

Spigot length (l2):

- $\varnothing 80 - 250 \text{ mm}$: $l_2 = 40 \text{ mm } \varnothing$;
- $280 - 315 \text{ mm}$: $l_2 = 60 \text{ mm}$.

Models

- MM - Male sleeve;
- MMG - Male sleeve with double-lip gasket.

Dimensions and Price List

Dimensions are expressed in mm.
Dimensions from Ø 80 mm to Ø 315 mm.
