

EANC CE Euroclass CE Expanded Polyethylene Tape

Description

Tape made of closed cell foam polyethylene Euro Class CE, used for the insulation of ducts and flanges.

Characteristics

- Cross-linked (chemical) closed-cell polyethylene foam with adhesive.
- Marking: CE Euroclass (CPR) B-s2,d0 and BL-s1,d0 according to European standard EN 14313:2009 (PEF).
- Thickness: 3 mm.

Use

Recommended for enhancing the technical and aesthetic finish of insulation, these can be used on pipe sections where insulation is difficult to apply and at pipe joints that must first be bonded.
