

EVBRE Electric battery for rectangular duct

Description

Forced ventilation, flanged electric heating batteries.

Characteristics

Material : galvanized frame.

Resistances: finned.

Use

For heating or post heating in ducted systems .

Required data for sizing

- Air passage section (W×H) in mm;
- Number of required stages; – electrical supply (V);
- Total power (kW);
- Airflow (m³/h).

Recommended air velocity: 2–3 m/s.

Special executions

- Stainless steel heating.
- Safety devices (pressure - flow switches).
