

Plastiroll Flexible ducts in special PVC profile

Description :

Flexible duct made of a robust and special spiralized PVC profile.

Characteristics :

Colour : light gray (on demand black or blue).
Temperature range: from -20°C to +80°C.

Size:

Standard 5 meters

Use :

Ventilation or suction systems where the hose is required to be self-supporting. The rotation of the turns in clockwise or anticlockwise direction allows an increase or decrease up to 35% with respect to the nominal diameter.

Price list

The length of the hose should to be considered in a extended position and at environment temperature (16/18°C - tolerance $\pm 2\%$). For packaging different to that indicated in the table increase of 10% on the purchase price.
