

EVTD EVO Centrifugal fan for circular duct

Description

Circular duct fan, with external terminal box, removable casing and adjustable motor, 220-240V 50/60Hz, power supply. Extractable motor/fan.

Characteristics

Models with nominal diameter from 100 mm to 315 mm with installation on circular duct. Compact, ruggedized white plastic enclosure. Low sound level. Hermetic structure sealed between the main body and support bracket, to avoid air leaks. Rubber gaskets on the flanges to improve air tightness with the ducts. Silent-block between the engine and the support to reduce vibrations and lower the noise generated. 3-speed motors.

Degree of protection IP44.

Models

- EVTD EVO
- EVTD EVO-T (equipped with an adjustable operating timer between 1 and 30 minutes and a 3 fixed speed motor. Not suitable for speed control).

Use

On circular ducting up to \varnothing 315 mm. Maximum flow rate from 210 to 1840 m³ / h depending on the model. Static pressure up to 560 Pa.

Accessories on request

- Suction mouth net;
- Fitting for rectangular ducts;
- Non-return damper;
- Speed switch;
- Speed regulators.

Dimensions

all measurements are in mm

Ease of installation and maintenance

To reverse the flow of air, simply rotate the central body by detaching it from the brackets. The rotation of the central body is also useful for positioning the terminal block in the best possible way, so as to obtain a better access position.
